Over the Tire Track Systems

Skid Steer Loaders Flat proof cushion solid tires

Continuous Steel Cords

Continuous Steel Cords (CSC) were developed to add extra strength and durability to a rubber track. Rubbertrax, Inc. has been offering CSC tracks for many years. Utilizing tracks with continuous steel cords (as opposed to tracks with steel cords overlapping at a single joint) can provide up to 40% more strength in the track.

Over the Tire Tracks

Skid Steer OTT: If your skid steer is running pneumatic tires and you need more flotation, and more traction then we have the over the tire track system for you. Our steel over the tire tracks do not require costly rubber pads. They are designed to run on finished surfaces with minimal impact or damage to **concrete and asphalt.**

Solid Cushion Skid Steer
Tires Now Available!

Undercarriage Parts

Since replacing worn undercarriage parts can extend the life of your track, we also carry an affordable line of undercarriage parts such as **sprockets, rollers and idlers** for Bobcat, Case, Gehl, Kubota KX series, Mustang, New Holland, Schaeff, Takeuchi and Terex machines. Our special heat treatment processes ensure consistent surface hardness. The superior quality hardening depth and strong core hardness provide excellent wear resistance, unbeatable strength, and high durability, all at a reasonable price. We highly recommend inspecting your undercarriage each time you replace your sprockets or tracks.

Tread Pattern Options

Compact Track Loader Tread Patterns:

In addition to the staggered block and C-Pad tread patterns you see, we also offer specialized tread patterns for almost any job site requirement. From turf friendly to total traction, we have the track you need to get the job done!

Zig Zag
